

Information on PPWR

In 2025, Regulation (EU) 2025/40 on packaging and packaging waste, called PPWR, was published.

The PPWR establishes requirements for the entire life-cycle of packaging as regards environmental sustainability and labelling, to allow its placing on the market. It also establishes requirements for extended producer responsibility, packaging waste prevention, such as the reduction of unnecessary packaging and the re-use or refill of packaging, as well as the collection and treatment, including recycling, of packaging waste.

Additionally, it contains specific requirements regarding PFAS in food-contact packaging applicable as from 12 August 2026.

We are monitoring current legal developments and are aware of this regulation. We can confirm that Südzucker complies with the applicable legal requirements.
